

Moksha Zala

Senior iOS Engineer | Swift | SwiftUI | 7+ years

livedz05@gmail.com | Gujarat, India | [linkedin.com/in/mokshag](https://www.linkedin.com/in/mokshag) | github.com/livedz

PROFILE

iOS engineer with 7+ years of experience working on production mobile applications using Swift, SwiftUI and UIKit. Comfortable taking features from requirements and architecture through implementation, testing and App Store release. Enjoys building reliable, reusable components and working closely with product, design and engineering teams.

SELECTED STRENGTHS

- Delivered and maintained production iOS features across Spotlight, Casting Networks and StaffMeUp.
- Built modular MVVM and Coordinator-based components with Swift Package Manager.
- Used Swift Concurrency, including async/await and actors, to simplify asynchronous workflows and improve thread safety.
- Worked with XCTest, XCUITest, Instruments and Thread Sanitizer to improve release confidence and application performance.
- Supported TestFlight and App Store releases with Fastlane, Xcode Cloud and App Store Connect.

EXPERIENCE

Senior iOS Engineer - Talent Systems LLC

February 2023 - February 2026 | Remote

- Developed production features for Spotlight, Casting Networks and StaffMeUp using Swift, SwiftUI and UIKit.
- Created reusable UI and feature modules to keep behaviour consistent across products.
- Implemented media workflows with AVFoundation and integrated GraphQL and REST services.
- Used Core Data and SQLite for local persistence and offline-friendly experiences.
- Collaborated with US-based product, design and engineering colleagues throughout planning, delivery and release.
- Investigated performance and stability issues with Instruments, unit tests and UI tests.

iOS Developer - Spontaneous Enterprise

March 2022 - February 2023

- Worked as the primary iOS developer on a Swift and UIKit application from early development through App Store release.
- Translated Figma designs into responsive interfaces using Auto Layout and Storyboards.
- Applied SOLID principles and dependency injection while integrating REST APIs, Core Data and SQLite.

EXPERIENCE, CONTINUED

iOS Developer - Intricare Technologies

October 2021 - March 2022

- Built Swift and UIKit modules for production applications.
- Improved image loading and scrolling performance in table and collection views.

Mobile Application Developer - Stemmons Enterprise

December 2018 - January 2021

- Developed cross-platform mobile features with Xamarin.Forms and C#.
- Implemented document, image and video workflows backed by REST services.

iOS Developer - Kit Solution

August 2016 - December 2018

- Developed native iOS functionality in Swift.
- Worked with Apple frameworks including ARKit and HealthKit.

TECHNICAL SKILLS

Languages: Swift, Objective-C, C#

Apple technologies: SwiftUI, UIKit, Foundation, Combine, Swift Concurrency, AVFoundation, Core Data, ARKit, HealthKit

Architecture: MVVM, Coordinator, VIPER, MVC, SOLID, dependency injection, modular Swift packages

Networking and data: REST, GraphQL, URLSession, Alamofire, SQLite, offline sync, APNs, FCM, deep linking

Quality and delivery: XCTest, XCUITest, TDD, Instruments, Thread Sanitizer, Fastlane, Xcode Cloud, TestFlight, App Store Connect

Tools: Xcode, Git, GitHub, Jira, Figma, Sketch, Firebase, Kingfisher

EDUCATION

Bachelor of Engineering, Information Technology

Gujarat Technological University | 2013 - 2016

ADDITIONAL INFORMATION

Experience collaborating with distributed global teams. Languages: English, Hindi and Gujarati.
